Web resources for large class learning enhancement

Project Number: 6000577

Principal Investigator: Prof. Kwok Sum CHAN

Grant Type: TDG

Abstract:

One of the problems that lecturers encountered in large class teaching is engaging the students. To engage the students in a large class, multimedia resources such as videos, simulation software are very effective. In this project, we want to develop a webpage which contains the web link to the resources available in the internet in a categorical manner, which can help the lecturers to find the resources needed in the lectures quickly and also serves the purpose of encouraging students to learn by themselves through these resources.
