

福建茶 (Fukien Tea)

Carmona microphylla

常綠灌木，原生於東亞一帶。其橢圓形葉片約1-2cm長，深綠色且有光澤。夏季有白色花朵。福建茶因為容易發展分枝、能抵受經常修剪，而常見於園林中作為造型植物(例如樹籬笆或球狀)或盆景。

Fukien Tea is an evergreen shrub which is native to East Asia. The leaves are obovate, dark green and glossy, about 1-2 cm in length. It bears white flowers in summer. Fukien Tea tends to develop numerous secondary branches and is tolerant to pruning, it is a topiary species (as a hedge or spherical plant) or used in Bonsai.

名稱 Common Name	福建茶 Fukien Tea
品種名稱 Botanical Name	<i>Carmona microphylla</i>
科 Family	紫草科 Boraginaceae
花期 Flowering Period	四月至十二月 April to December
果期 Fruiting Period	四月至十二月 April to December
校園分佈位置 Where to find in CityU	中國花園、李達三葉耀珍學術樓天台花園 及劉鳴煒學術樓天台花園 Chinese Garden, Roof Garden of LI, Roof Garden of LAU
