

GE1321 | Our Life in the Nuclear Age

Nuclear technology is widely used in modern society, ranging from simple smoke detector to more sophisticated PET scan medical equipment.

The course aims to help students to appreciate the basic principles, applications, benefits and impacts of nuclear technology to the society.

Through real-life examples and fieldtrips, students from different disciplines would be able to comprehend the opportunities and also the risks associated with the nuclear technology in order to benefit their own future careers.
