# GE2210 China: A Socio-Political Transformation

## 中國：社會與政治的演進

How do China's socio-political transformations relate to us? What are the major challenges and opportunities arising from China's modernisation from a socio-political perspective? Can our professional education and career development be related to the current and future development of China?

By using the best multi-media resources and through dynamic interactive learning in small-class workshops, this course helps students compose their answers to the above questions. Participants will acquire the knowledge and skills needed to excel in meeting the major challenges stemming from China's modernisation, thus broadening their horizons beyond professional contexts. During the course, we will spotlight crucial linkages among the social, economic and political aspects of a rapidly transforming China.
