- Synthesis and trafficking of dangerous drugs
- Investigation of firearms, explosives and bombs
- Examination of forge handwriting, and documents
- New technologies for crime prevention

GE2334 Science verses Crime (科學鑑證)

- ❖ This is a Gateway Education course offered by the Department of Biology & Chemistry.
- ❖ It aims to introduce students to the various disciplines of modern science and technology to aid fighting crimes. How scientific principles and critical thinking are applied in criminal investigations? How new technologies are used to prevent crimes? We hope that students can find some of the answers in our GE2334 course.
- ❖ GE2334 is a Level B2 course that bears 3 credit units.
- ❖ There is NO end-of-term examination. Students will be assessed by their performances in a series of assessment tasks, including mock crime scene investigation exercise, essays writing, site visits and short quizzes, throughout the course.
