CityU: A Leading Global University

Vision

City University of Hong Kong aspires to become a leading global university, excelling in research and professional education.

Mission

To nurture and develop the talents of students and to create applicable knowledge in order to support social and economic advancement.

Guiding principles

- Student success in academic achievement and career development
- Excellence in learning and research, technology innovation and knowledge transfer
- Benefit to the social and economic well-being of Hong Kong
- Accountability in the use of public resources
- Global outreach and international competitiveness

CityU's steady rise has been made possible by our commitment to creating an internationalised space for learning, our dedication to pursuing a research agenda designed to benefit society, our desire to establish a culture of innovation and discovery, and our mission to nurture student talent.

Hub of Professional Education

The College of Business has long-standing partnerships with the mainland and Hong Kong business community that reinforce Hong Kong's competitive edge. The college is one of the premier business schools in the world, accredited by AACSB International and EQUIS.

The College of Liberal Arts and Social Sciences is committed to conducting social science research that addresses critical social issues. Research projects cover a wide range of topics that expand our understanding of the human condition and development of human values.

CityU has won international acclaim in many areas of science and engineering. The University's largest college — the **College of Science and Engineering** — has been consistently ranked at the top in Greater China for published research papers. The establishment of the State Key Laboratory of Millimeter Waves and State Key Laboratory in Marine Pollution is further proof of the research strengths of the University.

The **College of Veterinary Medicine and Life Sciences**, the first of its kind in Hong Kong, serves as a leading local and regional centre of excellence in research and training. The College has launched Hong Kong's first-ever Bachelor of Veterinary Medicine programme, commencing in the 2017–18 academic year, in partnership with Cornell University, the top-ranked veterinary school in the world.

Hong Kong is one of the most influential and productive creative media hubs in the world, and CityU's **School of Creative Media** plays a central role in providing the talent that supports this well-earned reputation.

The **School of Energy and Environment** is one of the few in the region to lead teaching and research in two of the most pressing issues of our time — environmental quality and sustainable development in Greater China and the Asia-Pacific region.

The **School of Law** aspires to be an internationally-renowned centre for research and the teaching of law. The school is distinguished by its strong commitment to scholarship in common law, comparative law and international law, with an emphasis on Chinese law.

Centre of Research Excellence

CityU has established itself as one of the most innovative universities in Asia, pioneering research in diverse fields that are of high relevance on pressing issues. The success of its research programmes is reflected in both the amount of funding received and the number of projects funded as well as the quality of its research output.

CityU is particularly well regarded for its many highly cited researchers and is ranked top among the Hong Kong institutions in terms of the percentage of highly rated research in the areas of building technology, chemical engineering, civil engineering, communications and media studies, materials science, and mathematics and statistics, according to the Research Assessment Exercise 2014 conducted by the University Grants Committee of Hong Kong.

Global Focus, International Standards

Both the stature and sheer volume of CityU's relationships with global institutions continue to grow. This growth is also reflected in the quality of institutions with which CityU has developed academic links. The past few years have seen an increasing number of academic exchange programmes and partnerships between CityU and some of the most renowned institutions in the world, including University College London and University of Cambridge in the UK and Columbia University and Michigan State University in the US.

The CityU Shenzhen Research Institute aims to strengthen its collaboration with two state key laboratories and tertiary education institutions on the mainland. In addition, the CityU Chengdu Research Institute opens a new phase for CityU in the promotion of problem-driven research, professional education and incubation on the mainland.

CityU's enviable record of academic achievement is reinforced by the fact that a number of its faculty members hold positions with some of the most prestigious international research bodies in Asia and the rest of the world.

Like the incredible city in which it plays such an integral role, CityU continues to move, innovate, learn, teach and prosper.

COLLEGES & SCHOOLS

College of Business Departments

- Accountancy
- Economics and Finance
- Information Systems
- Management
- Management Sciences
- Marketing
