

# DERMATOLOGY SEMINAR

## Diagnosis and Treatment of Canine Atopic Dermatitis – from the past to the future

Atopic dermatitis is a common inflammatory and pruritic allergic skin disease in dogs which is often genetically predisposed and with characteristic clinical features. The diagnosis strategy and treatment options of canine atopic dermatitis have changed significantly over the years. Dr. Charles Chen, a Diplomate of the Asian College of Veterinary Dermatology, will help practitioners review the disease and update themselves on the latest developments in atopic dermatitis diagnosis and treatment.

**Dr Charles Chen**  
vetdermtaiwan@gmail.com
