Mercari is an e-commerce company with a mobile app for the sale of goods in an open marketplace of users, counting over 75 million downloads of the Mercari app worldwide, one of the most downloaded apps in Japan.

As they are now looking to hire a software engineer in their Tokyo headquarters, this is an exciting opportunity for new college graduates with the relevant background and qualifications. Join a young, up-and-coming tech company with an international culture and innovative product! Working within a small engineering team, your contributions will be meaningful to the group. The office is located in the trendy neighborhood of Roppongi in Tokyo, however, you don't need to be a Japanese speaker to apply.
